

ARCHITECT/ PROJECT MANAGER

Would you like to lead ambitious projects, take on responsibility, and work with a team to develop compelling solutions? Do you have experience in project management, the ability to keep track of the big picture, and a keen eye for quality? If so, we look forward to getting to know you.

About Us

C.F. Møller Architects is one of Scandinavia's leading architectural firms and has been synonymous with award-winning architecture in the Nordic countries and around the world for over 100 years. Our work combines experience, innovation, and Nordic values to create architectural quality that meets both sustainable and aesthetic standards. In this way, we create solutions with lasting value—for clients, users, and society.

C.F. Møller Architects has also had a presence in Berlin for the past seven years. In our office, located on a bright top floor in Schöneberg between Gleisdreieckpark and the Neue Nationalgalerie, an international team of over 35 architects works on a wide variety of projects.

About the Position

For our Berlin office, we are currently seeking experienced architects to lead challenging projects in Germany, particularly in the areas of office, administrative, cultural, research, and education buildings. You will become part of the multidisciplinary team at C.F. Møller Architects, where a passion for design, holistic thinking, and the commitment to turning creative ideas into compelling solutions shape our daily work.

Who You Are

You are an architect with extensive experience in project management and are familiar with the diverse requirements of complex construction projects—from conception through planning to completion. You are skilled at confidently integrating design, technical, economic, and organizational aspects.

You possess a strong architectural and technical understanding that enables you to confidently assess the quality of plans and develop compelling solutions to both design and structural challenges. Managing budgets, deadlines, and processes is just as much a part of your role as maintaining close coordination with senior management.

Your leadership skills are based on experience leading teams and projects, as well as on an empathetic, engaging, and clear communication style. When interacting with colleagues, clients, and specialist planners, you come across as confident, professional, and solution-oriented.

You bring five to seven years' experience in project management in German-speaking countries, as well as in-depth knowledge of all project phases. You combine a commitment to quality down to the last detail with a clear view of the bigger picture, and you stand out for your dedication, attention to detail, openness, team spirit and forward-thinking approach. Excellent communication skills and a good command of German and English are essential. Proficiency in Revit/BIM, MS Office and Adobe CS rounds off your profile.

We offer

We offer you a permanent, full-time position with a salary commensurate with your experience and performance, as well as the opportunity to work independently and take on responsibility. As part of an international team of around 300 colleagues across eight locations, you will be introduced to the in-house standards of C.F. Møller Architects.

Your place of work is Berlin. In addition, you will occasionally travel to the sites of our construction projects and to our headquarters in Denmark.

We support your professional and personal development through internal seminars and

regular participation in external training programs. You can expect a dedicated team characterized by open communication, mutual respect, and strong camaraderie.

Practical Information

Please submit your complete application materials in German or English via our career portal.

Your application should include a compelling portfolio, a cover letter, and a resume in table format specifying your available start date and salary expectations, as a PDF file no longer than 50 pages or 20 MB.
