

# ARCHITECT (M/F/D) WITH EXPERIENCE – STARTING IMMEDIATELY

Would you like to bring your ideas to life in ambitious projects, contributing both to attention to detail and a holistic perspective? Are you an experienced architect looking for an environment where teamwork, quality, and creativity matter? Then we look forward to meeting you.

## About the Position

We are currently seeking experienced architects for our Berlin office to work on a variety of projects across Germany – including office and administrative buildings, schools, residential developments, and cultural projects.

We work with both private and public clients, so experience with public sector construction processes is a plus. You will become part of the C.F. Møller team, where holistic and team-oriented thinking is key, and creative ideas are brought to life. You'll also be part of a multidisciplinary environment driven by a passion for architecture.

## Who You Are

We imagine you have at least 7 years of professional experience in German-speaking construction market. You are familiar with HOAI, DIN, ASR, and other relevant regulations. You have several years of experience in service phases 2–5, especially phase 5, with strong technical expertise in construction detailing and execution planning.

You've had exposure to sustainability certifications such as DGNB, LEED, or similar. You have a strong sense of quality – both in detail and overall. Commitment, openness, diligence, team spirit, foresight, and positive communication skills characterize you. You have good German and English language skills and experience with BIM planning processes. Ideally, you are proficient in our central planning tool, Revit.

## What We Offer

We offer a permanent position with a salary based on experience and performance, along with the opportunity to work independently and take on responsibility – potentially including project management in the future.

You'll be part of an international team of around 300 colleagues across 7 locations and will be trained in C.F. Møller Architects' internal standards. We place great importance on your professional development. Your daily workplace will be in Berlin, but you will also travel for planning meetings within Germany and occasionally to our headquarters in Denmark.

## Practical Information

Please submit your complete application documents in German or English (a compelling portfolio including a motivation letter, a tabular CV stating your possible start date and salary expectations, as a PDF with a maximum of 50 pages/20 MB) via the link below.

## About Us

C.F. Møller Architects is one of Scandinavia's leading architectural firms, with over 100 years of award-winning work in the Nordic countries and worldwide. Every day, we create architectural quality based on experience, innovation, and Nordic values. This ensures sustainable and aesthetic solutions with lasting value for clients, users, and society.

## A Unique Design Approach

Our designs are developed methodically and holistically based on a comprehensive analysis of the local context. We strive to set new global standards by applying a design approach that uniquely integrates urban planning, landscape, architecture, and component design.
