

ARCHITECT / REVIT–BIM SPECIALIST

COORDINATOR (M/F/D) – IMMEDIATE START

We are looking for an architect with strong technical expertise in Autodesk Revit and a collaborative, solution-oriented approach to project delivery. If you are confident in coordinating BIM processes, enjoy supporting project teams and have a strong understanding of planning workflows, we would be delighted to hear from you.

About Us

C.F. Møller Architects is one of Scandinavia's leading architectural firms and has been synonymous with award-winning architecture in the Nordic countries and around the world for over 100 years. Our work combines experience, innovation, and Nordic values to create architectural quality that meets both sustainable and aesthetic standards. In this way, we create solutions with lasting value—for clients, users, and society.

C.F. Møller Architects has also had a presence in Berlin for the past seven years. In our office, located on a bright top floor in Schöneberg between Gleisdreieckpark and the Neue Nationalgalerie, an international team of over 35 architects works on a wide variety of projects.

About the Position

For our Berlin office, we are looking for a **BIM Specialist Coordinator** to join and strengthen our project teams. You will bring sound technical expertise in Revit and Autodesk Construction Cloud.

In this role, you will implement C.F. Møller's Digital Methods standards and best practices at project level. You will support colleagues in developing their skills, provide day-to-day technical and workflow support, and take responsibility for BIM coordination within projects.

You will work closely with the *Digital Methods* department to implement, maintain and support C.F. Møller's standards and best practices.

You will become part of the C.F. Møller team, where holistic, collaborative thinking and the realisation of creative ideas are at the heart of our work. You will work in a multidisciplinary environment driven by a shared passion for architecture.

Who You Are

An architect or draftsman with a high technical competence in Revit (familiar with Cloud-based models), Autodesk Construction Cloud project administration, BIMcollab Cloud and BIMcollab Zoom.

You have experience in the **German construction market** (Nordic/ Scandinavian construction market knowledge is a plus). You are a highly competent Autodesk Revit user familiar with both the project and family editor environments.

Your strengths include strong communication skills and active engagement with project teams, a willingness to learn and support the development of others, openness, diligence, and a solution-oriented mindset. You have a professional level of German and English skills and are proficient in MS Office.

What We Offer

We offer a permanent position with a salary commensurate with your experience and performance, as well as the opportunity to work independently and take on responsibility.

As part of an international team of approximately 300 colleagues across eight locations, you will be introduced to C.F. Møller Architects' internal standards.

Your primary workplace will be Berlin. You will also occasionally travel to our project sites and to our headquarters in Denmark.

We support your professional and personal development through internal specialist

seminars and regular participation in external training opportunities. You can look forward to joining a committed team characterised by open communication, mutual respect and a strong sense of collaboration.

Practical Information

Please submit your complete application documents in German or English via our career portal.

Your application should include a compelling portfolio, a cover letter and a tabular CV stating your possible start date and salary expectations. Please submit all documents as a single PDF, with a maximum of 50 pages and a file size of no more than 20 MB.
