

Internship Landscape & Urbanism

Do you have a passion for architecture, landscape and urban planning? And do you want to work for an international architect and design studio that develops world leading Nordic architecture? Then you are the one that we are looking for!

Our coming team of interns will join us in September 2024 for a period of five months across our Danish offices in Copenhagen and Head office in Aarhus.

What we can offer you

You will become part of C.F. Møller Landscape & Urbanism team, which is an independent department that solves both landscape and urban development tasks and landscape tasks linked to the rest of the studio. You will have colleagues and professional relationships across disciplines, departments, and projects, and you will experience a dynamic workplace with focus on sustainability. You will be integrated into our projects from your very first day.

We will jointly take responsibility for your learning outcome, ensuring that the internship is tailored to your needs and aspirations and make sure you have the possibility to develop and strengthen your skills and knowledge as much as possible.

You will therefore, on your first day, be assigned an experienced architect as a mentor, who will guide and mentor your development throughout the internship.

Expand your knowledge and your competences

We expect our interns to make a difference and offer a wide range of experiences within the architectural process in a passionate, professional, and international environment.

During your internship, you will be introduced to a range of topics in our 'Skills Workshops' developing your professional knowledge and skills covering everything from sustainability to BIM.

As an intern at C.F. Møller Architects you also have the opportunity to attend a wide range of professional and personal courses for free in our own developing platform GROW. Once you have completed a course, you will be awarded a certificate that will enhance your professional profile in your future working life.

Experience a community

You will start your internship with a team of other interns from all over the world. At the introduction day you will be introduced to each other and to the company ending the day with an 'Architecture Walk' around the city, where a colleague shows you a selection of projects which C.F. Møller Architects has designed.

We in C. F. Møller appreciate our employees and the social connection that we have in the office. You will therefore, during your internship, experience all sorts of social events, ranging from Friday bars and staff parties to breakfasts and professional development.

About you:

- You are studying architecture or urban design.
- You have both theoretical and practical qualifications in Rhinoceros and Adobe CC and have preferably knowledge about, Grasshopper, Enscape, Vray and Autocad.
- You are professionally skilled and dynamic and have a desire to test the tools you have obtained from your university.
- You are independent but thrive in a team.
- You speak English or one of the Scandinavian languages fluently.

Please note:

- C.F. Møller does not hire interns who have already graduated. The internship must be part of your studies or on sabbatical leave with a signed enrollment
- We only accept interns for a minimum of three months and preferably five months
- We normally hire interns twice a year - spring and autumn
- Financial support - by agreement. Please inform us if you receive any form of scholarship.

Application deadline:

Application deadline is December 1st, but we will conduct job interviews on an ongoing basis

If this sounds like something for you, please send us your application by clicking at "Apply". We are looking forward to hearing from you!
